OUR MISSION

AFIACARE MISSION

AFIACARE supports healthcare organizations in making care safer, smoother, and more effective.

Our approach is built on three complementary drivers that support sustainable performance:

People — AFIACOACH®

Engaged, high-performing teams through executive coaching

Processes — AFIACARE®

Safe, connected equipment through audit & consulting engagements, project management and biomedical maintenance

Tools — AFIACARE Workspace®

Greater efficiency, responsiveness and visibility through an AI-powered CMMS designed for healthcare organizations

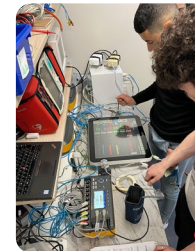

MISSION COMPANY “LOI PACTE”

“Enabling healthcare professionals to improve the efficiency and quality of patient care while advancing more inclusive healthcare”

AFIACARE works with UTC Compiègne to train students and provide meaningful internship opportunities.

BIOMEDICAL TRAINING

On-site training modules for biomedical technicians, designed to bring maintenance operations in-house while reducing costs and response times.

- Process implementation
- Medical device performance testing
- Electrical safety testing

AFIACOACH EXECUTIVE COACHING

Support from a certified professional coach on topics including:

- Leadership & communication
- Team management
- Starting a new role
- Support for recent graduates

Management coaching on certification recommendations HAS, criterion 3.3-04:
Team leaders receive management training or coaching

Coaching 15 hours

—
10 sessions of 1 hour 30 mins
in person or online

Certified Executive Coach– HEC PARIS

AUDIT & CONSULTING

Analyze • Prioritize • Structure

An independent assessment to optimize your biomedical organization and build a practical action plan

• Inventory and current-state assessment

A reliable view of your equipment fleet, usage, and organization

• Biomedical engineering consulting

Better-defined technical choices and more secure investments

• Bring maintenance in-house

Resources, processes & tools to increase autonomy

PROJECT MANAGEMENT

One point of contact for your IT and biomedical projects

• Equipment connectivity

Connect medical devices to your information systems, including electronic patient records and hospital information systems

• CMMS / Workspace

Scoping, deployment & training for an operational CMMS

Safety
Reliable and compliant solutions

Performance
Controlled projects with sustainable results

Cost control
Optimized resources and investments
